SUMMARY

Python-focused Software Developer with experience in Python, React, SQL, and application development. Interested in building reliable full-stack applications with clean architecture, practical user interfaces, and efficient backend systems.

EDUCATION

Bachelor of Technology in Information Technology (2022 - 2026)

Balasore College of Engineering and Technology, Balasore
- CGPA : 8.39

Intermediate

Fakir Mohan Junior College, Balasore
- Percentage: 56%

Matriculation

Saraswati Sishu Vidya Mandir, Balasore
- Percentage: 88.5%

INTERNSHIP EXPERIANCE

Summer Intern - ITR, DRDO (June 2025 – July 2025)

- Developed an AI-assisted tender document comparison system at ITR-DRDO using Python, pdfplumber, pytesseract, and Ollama-based LLMs, generating LaTeX reports with 90%+ accuracy and reducing manual evaluation time by ~70%.

Summer Intern - PXE, DRDO (May 2024 – June 2024)

- Developed scalable 3D models using Unity, C#, and Android Studio to enhance defense document visualization for XR environments, resolving dimensional limitations and ensuring accurate, efficiently rendered outputs in collaboration with scientists.

PROJECTS

Mentor Connect - Full-Stack Mentorship Platform (MERN, Socket.io, WebRTC)

- Collaboratively developed a full-stack mentorship platform with role-based authentication, mentor discovery, session booking, and RESTful APIs using MongoDB and Node.js.
- Implemented real-time messaging and peer-to-peer video communication using Socket.io and WebRTC; deployed the application on Vercel and Netlify.
- Live Demo: https://mentorship-platform-lyart.vercel.app/

TubeShelf - CLI Video Library Manager (Python)

- Built a command-line application with CRUD operations, JSON persistence, YouTube URL/duration validation, and browser-based video launching.
- Implemented exception handling, file handling, regular expressions, URL parsing, and backward-compatible data migration using Python's standard library.
- Github: https://github.com/sagarpani/TubeShelf

SagarEvolves.dev - Developer Portfolio (React, Vite, Tailwind CSS, Framer Motion)

- Designed and developed a responsive developer portfolio with reusable React components, client-side routing, and Tailwind CSS.
- Implemented interactive animations and scroll-based transitions with Framer Motion and deployed the application on Vercel.
- Live Demo: https://sagar-evolves-dev.vercel.app/

TECHNICAL SKILLS

- Languages: Python, JavaScript (ES6+)
- Frontend: React.js, HTML5, CSS3, Tailwind CSS
- State Management: React Context API, Redux Toolkit
- Database: Oracle Database, SQL
- Tools: Git, GitHub, Vite, VS Code
